

12/06/2009 - Table Code For Mysql Database

Let learn a little about Mysql Database. First we make a table for database. Let say we use students as a name of a database; We want to have a simple database for student's results.

```
CREATE TABLE IF NOT EXISTS `results` (  
  `id` int(4) NOT NULL auto_increment,  
  `name` varchar(65) NOT NULL,  
  `matrix` varchar(65) NOT NULL,  
  `course` varchar(65) NOT NULL,  
  `quiz` varchar(65) default NULL,  
  `assignment` varchar(65) NOT NULL,  
  `test` varchar(65) NOT NULL,  
  `experiment` varchar(65) NOT NULL,  
  PRIMARY KEY (`id`)  
) ENGINE=MyISAM DEFAULT CHARSET=latin1 AUTO_INCREMENT=1 ;
```

We insert this code into phpmyadmin after click sql, make sure the database is students;
